

THE PERFECT SOLUTION FOR FINALIZING STUDENT SCHEDULES

ClassChoice provides a one-stop solution for drop/adds and requesting, saving your counselor or registrar valuable time during the term change or in preparing for the upcoming school year. Using preset parameters and historical grades, ClassChoice guides students through the key aspects of the scheduling process, leaving them with a feeling of ownership and the staff with a lot less manual labor and paperwork. Allow your students to edit or create their own schedules on line with built in rules that help them choose the correct classes.

BE THE HERO IN YOUR SCHOOL
ClassChoice gives counselors power to manipulate schedules quickly and easily without worrying about dates, prerequisites, or special lists. You can allow parents and students to do the schedule themselves.

Put the POWER in the hands of those who need it

- Compatible with most SIS's - all that's needed are a few simple text files and the ability to import them
- Prerequisite capabilities by course and/or final percentage for scheduling and requesting
- Web-Based - no special applications and students/staff can log in from school or home
- Multiple Schools can be hosted on one server
- Capable of handling hundreds of students at once
- System Generated Reports that aide staff in making decisions
- Students can print and view their own schedules
- Over 20 filters for gender, grade level, repeating, teacher restrictions, student restrictions, prerequisites, section linking and more
- Schedule and Requesting Packets - multiple courses assigned based on first course selected

STARTING SCHOOL THE RIGHT WAY KEEPS EVERYONE SMILING
